Reasons for Allowance

1. Drawings replacement sheet submitted on 2/21/2008 is accepted.
2. Claims 1, 3-6, and 17-25 and 27 are allowed.
3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brion Heaney on 5/14/2008.

The application has been amended as follows:

- i. Cancelled claims 7 and 26.
- ii. In claim 1, lines 14-15, deleted the phrase "second chamber indirectly exchanging heat over at least a portion of its length" and replaced it with ---said first and second chambers indirectly exchange heat over at least a portion of their lengths---.
- iii. In claim 18, lines 15-16, deleted the phrase "second chamber indirectly exchanging heat over at least a portion of its length" and replaced it with ---said first and second chambers indirectly exchange heat over at least a portion of their lengths---.
- iv. In claim 27, lines 14-15, deleted the phrase "second chamber indirectly exchanging heat over at least a portion of its length" and

Art Unit: 1795

replaced it with ---said first and second chambers indirectly exchange heat over at least a portion of their lengths---.

4. The following is an examiner's statement of reasons for allowance: The partial oxidation apparatus as claimed in claims 1, 18, 24 and 27 wherein said means for supplying preheated gas comprises an annular chamber that is coaxial with said jacket; when combined with having a first chamber, and a second chamber which are coaxial with said jacket, and which are an indirect heat exchange relationship over a portion of their lengths with said means for supplying preheated gas as claimed and wherein said second chamber has a volume suitable for carrying out a piston flow, the combination is missing from any prior art of record including that of Clawson et al. (US 6,126,908) and Sennoun et al. (US 6,936,238). Fuderer's apparatus teaches a means for supplying gas, however, said means does not comprise an annular chamber which indirectly exchanges heat over the length of the first and second chambers as claimed. Furthermore, Clawson and Sennoun fail to provide a coaxial annular means for supplying a preheated gas as in the instant claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
